

May 20th 82

Dear G. Dawson:

I commend to your kind attention Mr. Lucien M. Turner, who is on his way to Inuvua Bay where, by permission of the Hudson Bay Co. he will probably remain for several years. He goes there on behalf of the U. S. Signal Office — to make international meteorological observations —, and of the Smithsonian Institution — for natural history purposes. His equipment is very complete, and our hopes for successful results are very high. We have promised to present to the

Hudson Bay Co. in London a series of
Mr. Turner's collections, to be placed
wherever the Compaus may designate.
Should you think proper to obtain
the permission of the Compaus to
take charge of them for the Museum
of McGill College, such an arrange-
ment would be perfectly agreeable
to us.

hoping you will receive Mr.
Turner kindly and referring you
to him for fuller information
as to our plans,

I remain,

Sincerely yours,

~~Spencer~~
