

Foord  
GEOLOGICAL & NATURAL HISTORY SURVEY.

Alfred R. C. Selwyn LL.D., F.R.S., Director.

MUSEUM & OFFICE, SUSSEX ST. OTTAWA.

Dalhousie, N.B. 3<sup>rd</sup> August 1882.

Dear Sir,

I have taken the liberty of sending to your address, at McGill College, a box containing rather a fine specimen of a fossil fern from the beds at Scammanac Bay. The specimen was obtained by splitting open a large slab of sandstone which had fallen from the Cliffs. I thought you would like to see the specimen, & that you

would kindly name it  
for us, before it is deposited  
in the Survey Museum.

I came here mainly to  
renew my health which  
was somewhat run down  
this Spring after an attack  
of facial paralysis. The  
sea air is always bene-  
ficial to me, & I am  
much the better for it.

I purpose spending a  
few days at Campbellton,  
for which place I leave  
here tomorrow. I hope  
to have the pleasure of  
seeing you in Montreal  
on my way back to

Ottawa. I trust you hear  
good accounts of your  
son George, & that he is  
enjoying his tour in  
Europe.

With kind regards to  
Mrs Dawson & all your  
circle,

I remain

Dear Sir

Yours very truly

Arthur H. Foord

Dr J. W. Dawson, C.M.G., F.R.S.
