

Geological Survey.

Ottawa. 1st Mar.

My dear Sir,

You have very kindly anticipated the request contained in my letter of yesterday in sending me the other half of Mr. Ferrier's specimen which will enable me I hope to work out the species. I can spare Mr. Ferrier a Section

I will according to your suggestion beg him to let me have one half of the specimen for the Survey Museum, in Exchange therefor.

I beg to thank you for the Report of the Peter Redpath Museum containing descriptions of new Lower Carboniferous fossils.

I remain,
Yours very truly
Arthur H. Foord.

Dr. J. W. Dawson, C.M.S., F.R.S.
