

Saturday

My dear Sir,

I cannot speak  
with certainty regarding  
any articles published by  
my father; but a letter  
from Albany, dated 1841  
refers to a paper written by  
him (evidently on insects) which  
Dr Richardson of the

Land Arctic Expeditions, spoke  
of publishing in a "Naturalist  
Journal", and again in 1862  
Capt. Blahistin (of Woolwich)  
speaks of another paper of my  
father's on "Water fowl of  
Hudson Bay": published  
in the "Zoologist" —

He presented the  
Smithsonian Institute, Washngton,  
with a number of specimens  
of Natural history, but

whether he wrote papers in  
connection with them or  
not, I cannot say -

Yours very truly
