

Dariusz Weyhe
April 1883

Apr 14

Dear Dr. Dawson,

I wish to replenish my stores of dissecting material this summer - I think you said Mehis was a good as any place in the gulf as a collecting place - As you yourself have collected there, there is probably a boatman who knows the ground.

Do you think June too
early to go? People here
seem to think it would
be dreadfully cold then,
but later in the year
would be too late
for securing some things
(surface forms) —
if you have any experience
of the weather in June
I shall be obliged if
you will tell me of
it

With kind regards

Yrs sincerely

R Ramsay Wright.
