

Belledune

Gloucester Co. N.B.

May 17<sup>th</sup> 1883

Dear Sir,

I take the liberty of sending you for your perusal a short paper on "Erosion from Coast and Floating Ice in the Bay Chaleur district." Although it has been under my hand for some years it is far from complete, my observations on the subject not being by any means as full and exhaustive as I could wish. But I deem it best to put together the few facts I have and publish them.

I think there is something in this question of erosion from the

the Causes indicated; more perhaps  
than I have attempted to describe,  
or than many geologists are aware of.  
I intend to follow up the subject as  
time and opportunity permit. Mean-  
while, you can make any use  
you wish of my paper, or of the  
facts contained in it, but I would  
like that you would hand it to  
the editor of the Canadian Naturalist  
for publication in the next issue.  
A proof may be sent to the fol-  
lowing address; -

"Bellevue  
Gloucester Co.  
N.B."

I am, Dear Sir  
With much respect  
Your obedt servant,  
Robert Chalmers

J. M. Dawson Esq. M.D. 3  
Montreal. P.Q. 3
