

London June 1
/ 83

Myrica Principae Dawson

Since Dec^r
I letta a few days
ago, on my return
from France, I have
seen the letter. It
is the Conte in "Nature"

Reb notes .
which accompanied
the Paper sent to

Mr. P. Stone -
and the stated
opinion of experienced
"Indian Trackers"
seemed true to me
to Human origin
of the footprints
highly probable. But
at all events I
thought the subject one

of what value to
be taken in Europe

As man was,
from the evidence, a
contemporary with
the manuscript in
Europe, I don't think

to discover even
if verified? about
much the question
of the authenticity of
man.

Myself

You do not mention
when you expect to
be in this country.

I hope I shall not
miss seeing you. Even

if I am not in
London I hope you

might be induced

to come to see us

in Scotland in the

Autumn

Yours truly

Erskine
