

~~Coldstream, Aug 7~~
Jas E. Gray / 83

My dear Principal

I have been Botanying
all summer and have
been getting along very
well, found a little dif-
ficulty in commencing
but it is quite easy
now. Have pressed about
two hundred specimens,
but only named them
on rough paper. Would
it be too much to ask
you to send a sample
of how the flower is
named. I have it as
given in the lecture
room

room but taking "*Lysimachia radicans*"
page 315- Erubi's Manual for example
is there anything to be done with

Stenonema in the naming of it
and oblige

Yours truly
Geo. Gray
