

5^o Berkeley Place

Cheltenham

Sept. 1st

My dear Dr. Dawson,

I am afraid I have
been sadly neglectful in not
answering your letter of
October 24th. The reason is this,
1^o I have been called away
on some business matters. 2^o I
have been hoping to get some
specimens of corals for you
from the Solites. Unfortunately

some of the Reefs are now
exposed in this neighbourhood.
The only place I know of
where I can get specimens
is some miles away on the
top of the battowolds. I
am afraid I shall not be
able to get there at present
and if it will suit you
as well I think I had
better take specimens over
to Baroda with me when

I go next year. If, however,
you want them before that
time please say so, and
you shall have them.

Just now I am under the
Doctor's care myself; I am
quite over done with sitting
up at night and am
ordered complete rest. You
will be grieved to hear
that Doctor Wright is
much worse.

I am very much obliged

Withered
Oct 183

for the kind way in which
you spoke to Miss Beall
on my behalf. I don't think
the Lady Geologist will visit
the College. If I am rightly
informed, she has had no
practical study; only book
knowledge.

With very kind regards

Believe me

Yours very truly

Edward Wethered

^{Oct 2}
G.S. Your letter of Oct. 31st has arrived. Very much
obliged for the trouble you have taken over the
Canadian Coal. I will do my best to get you good ^{of the} coal fact.
