

Goldstone, Leeds.

21 Nov: 1883.

My dear Dr: Dawson,

If you can spare
time to read over the
enclosed paper, & a
few minutes to drop me
a line today about
you think of the position
we have taken up, I
shall be greatly obliged.
The matter comes on

for discussion on Friday
next.

The opposite scheme
is to have no Technological
Faculty, putting it under,
with the Arts - and then
to have a big Senate
composed of all Depts.,
with two representatives
elected therefrom ^{to} the
Council. - This, of
course, means the

lection of a Pure Science
& Medical man & the
consequent extinction
of the Jesuits.

Wene all I am glad
to say well & hope you
are all the same.

With best regards,

Very faithfully Yrs,

J. F. Armstrong.
