

Gloucester Mass ~~Albany~~, Aug. 2<sup>nd</sup> 1884

My dear Dr. Dawson

I sent you the specimen of Equisetites and the Dentaculites - from Albany on ~~Friday~~ Thursday, having ~~stayed~~ myself yesterday morning -

I shall probably remain here a week

- If you are disposed to send any note on the equisetites I will try to have it inserted in place of my own - and I should greatly prefer that you should do so.

There has been great delay in ~~press~~ publishing the Report, and the explanations of plates are not yet printed off - although the body of the Report is printed - my note stands under explanations of figures on plate 15 -

I will write the printer & hold this till I can hear from you - please let me know as early as you can if you send any note for this object -

Please address me  
285 Rock House  
Gloucester Mass

There is a mail sent to that house  
from the Gloucester office -

Very truly yours  
James Hall
