

My dear Sir William

Your kind letter
with accompanying calendar
of McGill college came
to me some time ago.

I will probably write you
again at a future day in
reference to my little boy.
As he will have occupation
for a year or so, that will
still enable him to go on
with his studies, I will

Keep him here, for a year
or two until he is more
mature; and in the mean
time he can be preparing
himself for the work before
him.

You were kind enough
to say that you would like
to have a preliminary notice
or rather account of the
new Cambrian species of this
locality for the Canadian
Naturalist. I am now pre-
paring such an account for
our Bulletin, but as this
has so limited a circulation
it would hardly interfere

with the insertion of the
same in the Naturalist,
so if you desire it I
will as soon as the article
is in print send you a copy
for the Naturalist. It
will probably be a month
before the Bulletin will be
ready, but if you are printing
the Naturalist about that
time and a proof in page
would be desirable to you
I might get it to you without
waiting for the distribution
of our periodical publication.

Very truly yours

A. Mathew
