Feb. 5, 1875.

Sir H. E. Dawson,

MacGill College,

Dear Sir:-

I am studying the Stromatopora of the Chazy rocks in Vermont. I find very little help in the various Geological reports. Will you kindly assist me by directing me to accessible publications that will be of service in my study?

I shall be very glad to acknowledge the favor by sending your cabinet such Vermont fossils as I may have or may obtain if you will intimate what will be acceptable.

I will add that I have discovered in two localities a fossil form which I suppose corresponds to your *Charitites compressa*. The rock in which found has been regarded as Chazy.

Yours very truly

Henry S. Geely
