

Official communications should
be addressed to the
Director of the U. S.
Geological Survey

DEPARTMENT OF THE INTERIOR

United States Geological Survey

Washington, D. C. February 20, 1885.

26th Jan
Prof. Geo. M. Dawson,
McGill University,
Montreal, Canada.

Dear Sir:

Your letter of Feb. 10th
is at hand ^{and} contents noted.

I learn from a friend, that Prof.
Hall, has proposed a new genus
to include the Stromatopora from
the Saratoga Potsdam limestone.
It is described in the 35th Report
New York State, Museum of
Natural History. I hope, that on
reexamination you will find more
evidence of the organic origin
of the Grand Cañon specimen.

Very Truly Yours,
Chas. D. Walcott,

Walcott
