The Religious Tract Society,
56, Paternoster Row,

London March 18 1885
E.C.

My dear Sir,

Frederic
Pomys
Flower
due 22/85

I send you two or three of
the Present Day Tracts which
we are issuing. On one of
them at least you will see
the plan of the Series, its
scope and aims, - as let me
have only one tract of
a ~~str~~ in the scientific
branch of the Series.

Mr Carruthers the keeper of
Botany in the British Museum
has undertaken to write
me on "The Rock word of
plant life and Evolution"
I write to ask if you would
be disposed to contribute
as a name to the Series.

It would be desirable to
select titles of the widest

interest and to keep down as
much as possible of the time
taken by any other writer, each
of course on close related
subjects must cross each other
at some point, this is unavoidable.
I should be glad to assign
you any suitable subjects
within our scope that you
may select. On adoption by
Committee I should have
the pleasure of

writing a copyright order
at the rate of 12 guineas
per sheet of 32 pp. The
maximum length for the series
is 64 pp including argument
of the tract and Title page.

If you are able to undertake
the work I should be very
glad to have a manuscript

at your earliest convenience

but fix your own time.

Yours truly

Rev. John Kelly

Editor of the Present Day
Series

William Dawson
