

Matthew
My W

My dear Sir Wm

The postponement of the meeting of A.S.C. will enable me to stop at Montreal on my way to Ottawa as you desired I should do. An hour with you to talk over the bearings of the palaeontological discoveries in the Cambrian here will be more advantageous than correspondence. I will bring with me a collection of

the fossils for you and
also the drawings for my
article which will give
you a better idea of the
results than can be arrived
at from a ~~study~~ ^{glance at} of the
fossils. I would like
this opportunity to advise
with you relative to fu-
ture work in this field and
to present to you more
fully the result of my ex-
amination of the collections
thus far made.

I expect to leave here
of Friday night, and if
I make my connections will

reach Montreal on Sunday
morning: this will give me
most of Sunday, and Mon-
day in Montreal, and if you
will kindly send me word
when (and where) I can
see you, I will endeavour
to be there at the time spe-
cified.

When I sent my article
for the record I did not
know that the Provincial
grant to the Natural History
Society of Montreal had been
withdrawn. If this makes
anyone liable for expenses of
publication (not otherwise
on my paper)

met, or if there is no pro-
vision for such extras as
wood cuts I would ofcourse
be ready to meet such out-
side expenses.

I observe that there
are some vacancies to be
filled and have received
advices of two candidates
for membership in A. S. S.,
one said to have your support.

Hope to meet you shortly

Ernani dear Sir

Yours very truly
A. M. M.
