

Phila. 6-18 1885-

Dear Sir William

Yours is rec^d and I am
of course much interested in
your conclusions respecting
the Laramie Flora.

The first printed abstract
of your paper you will find
copied in the July Amer. Nat-
uralist soon to be out.

Scott in a late review
of my book in "Science" (no. 122)
thinks the Laramie + the
Puerco are cotemporary, but
I can prove to the contrary.

Very truly yours

Edw. D. Cope

James
Cape

Wills. 6-12 1800

Dear Sir William

I have been much interested in
your excellent review respecting
the Linnæus MSS.
The first printed abstract
of your paper you will find
inserted in the 4th issue, but
which counts for nothing.
I look in a late review
of your book on "Linnæus"
to find the Linnæus MSS. &
never see any mention of it,
I can assure you the contrary.
I am, Sir, your
Obedt. Servant
J. G. Cooper
