My dear Sir William

I returned yesterday by
express in one parcel the fossil
(*Libellula carbonaria*) & the wood block.
I trust they will reach you safely.
The supposed abdomen of a larval
dragon fly turns out to be the abdomen
of an Arachnid which I call Gaeo-
phonus - I have one with the ~~thorax~~
cephalothorax attached, from Mayon
Creek - apparently the same species.

Very truly yours

Wm. W. Cudda
