

1874
British Association for the Advancement of Science,

22, ALBEMARLE STREET,

LONDON, W.

Aug 7 1885-

Dear Sir William Dawson

I am much indebted to
you for your letter and
information concerning
Canadian libraries and
have given instructions
for the volume to be sent
off at once to the office most
important in the list -
which you kindly sent -
Many thanks for your

kind promise of a contribution
to the Woodward Testimonial
I have sent your name to the
Treasurer for two guineas as
directed - About 300 has been
promised, so that we shall be
able to give him something
substantial -

I have recently returned from
a month to the Alps, devoted
to part to visit but in great
part to geology - By
working on a more systematic
plan than heretofore I have
picked up some information
which I think will be valuable

I am daily expecting your

Egyptian roots back for letters
and shall tackle them at once -

My sister is away in the country,
so she would send kindest regards
to yourself and family -

I got a letter from Dr Warrington
yesterday and hope to see
him on Saturday evening

Very sincerely yours

J. Bonney
