Sir William Dawson
Montreal

My Dear Sir

As requested, I send for the Academy 150 of the Bulletin of Dr Dawson's Paper.

I have been as careful as I could to have it correct and well "got up" & hope that it will be satisfactory. It is certainly a very valuable paper and our Academy is somewhat proud of it.

Personally Dr Dawson will please accept my most cordial thanks for this paper and for his many courtesies. I also inclose 1/2 doz of the Woodward-Shuman paper on the "Determination of the Minnesota Clay" this paper does not touch the Radiolarium and other fossils that are finer ^{and} of more interest than the Dawson.

I send Dr Dawson's "Notes" on the slides that he examined and if yourself or Dr D would like to further examine ^{the slides} or compare them I will send them to you with much pleasure.

I also inclose a Report of a Committee of our Citizens Association on which I have been doing a little work in the interest of "Pure Water" Will you if convenient be so kind as to look over my part of that report and advise me if I am in the right and permit me to show you reply to the committee of the Citizens Association.

our City authorities claim that the sewage that they discharge into the Lake does not reach the Suburbs and that the City water supply is not contaminated.

Most truly Yours
W. M. Shuman
