Oct 29, 1885

Dear Sir,

I write to thank you very much for your great kindness in sending me through Mr. Thos. the section containing Eozon Canada, and the pieces of ortho-class Swiss and Labradorite rock. I was particularly anxious to see the Eozon, and have read with great pleasure the papers which you so kindly sent with it. I had not seen the paper read by you in

1876

1876

1876, as I have only been a
 member of the Geological Society
 for the last two or three years. -
 The authorless Gneiss is also very
 interesting to me, as I went to
 Loch Torridon a few years ago to
 see and examine it there, but
 I could not get a specimen nearly
 as fresh as the one which you have
 so kindly sent me. - I had
 already examined the Labradorite
 Rock from a bought specimen, but
 that was almost entirely Labra-
 -dore, and I shall be glad to

had
 to
 me
 tion

Sir

have a microscopic section of the
to compare with it. - Allow
me again to thank you for the
trouble you have so kindly taken

and remain, Dear Sir,

Yours faithfully

A. W. Rowe
