Dear Sir, We take great pleasure in sending by today's Express, paid, for your private library, a copy of the latest issue of our "pet" publication - Webster's Unabridged Dictionary - which please accept with our compliments.

Since we became the publishers of the work - something over a third of a century ago - we have spared no outlay to keep it fully abreast with the times. That it has become generally acceptable, alike to the scholars and the masses, we think is attested by the warm testimonies that have come to

us from all parts of the English  
speaking world. We invite

your casual attention to a few  
of these which are in the packages.

You may also be interested in  
examining the "New Pronouncing  
Gazetteer", occupying 100 pages, and  
just added to the work. The Patient  
Reference Index too may be a novelty  
to you. We shall be glad

to hear that the book reaches  
you safely, and will add that  
it would be very gratifying to  
receive a brief expression of  
your opinion of the work.

Very truly
