

University,
St. Andrews, A. B.

22nd Nov

Dear Professor Dunsen

A specimen of
the *Sulphurium* *Porcum* (???)

shall be sent either
by this or next post

to your care of

Museum Liverpool

Before closing this

I will look for
proof slips of ^{incomplete} articles,
please return them

When published
I will send you

copy

I do not know if the
plates will be in it.

The London men do
not seem to be able
to draw sliced rock,
unless a Scotch man
can do them I will
have to draw them
myself in stone
(I have already drawn
them on paper) - and
as I may be from
home for some time
this will delay
matters considerably.

I am haste
yours ever
W. Foster Huddle
