

Boston 11<sup>th</sup> Feb '86

My dear Sir,

I write to ask whether it would consist with your other engagements to deliver a course of eight or ten lectures next winter before the Lowell Institute upon some branch of geology.

You know the character of a Boston audience, & can judge better than I how to select your subject, & as to the time of delivery I shall be happy to consult your convenience.

Remain Yours Very truly

Sir William Dawson

Augustus Lowell

Sweet  
Dec/86
