

B. W. THOMAS,
1942 INDIANA AVENUE,
CHICAGO.

Chicago March 10 / 1906

Sir William Dawson

My Dear Sir

Thanks for
your favor of the 8th just put at hand-
work. We are well pleased that the "Food
Academy" is progressing. The next Meeting of the
(13th) but please do not feel in the least hurried
as the paper will be most welcome at any
time convenient to you. I presume that it will
require some little time to look ~~it~~ over manuscript
before it can be properly read to an audience.

I will repeat what I once before said-
that I do not expect that you will return any
of the samples of material - and that if any
or all of the slides are of the least value or
interest to you - you are more than welcome to
them. I have here a large number of the same
class more than I can use to advantage - if you
retain them they may be of some value in the
future - to some one - that is all they are good for.

I inclose a slip headed "Water supply"
but which relates to artesian wells in this vicinity -
if published I will send the paper to you.

Most Sincerely Yours

B. W. Thomas
