

Kenington Palace.

March. 23. 1883

My dear Mr Villiers

The recent vote of
Transvaal might have been
made more attractive to
the N. O., with the aid
of a little more illustration,
which with photo-pressure
could easily be managed.

But we must congratulate
ourselves that in spite of
Departments of Trade the
front for America is to be
continued.

Prof. Seligson is hard at
work here with the
Exhibition arrangements.

India makes a splendid
show. Candari will be
high interesting to the spectators
but most useful to the
intending emigrants, & the
space allotted is very large.

I hope you will not
allow the English visit to occur
without letting me see you.
Believe me, with many thanks
for parting with
You very truly
Lothian
