

Boston 7th April 86

My dear Sir,

Your letter of April 3^d is before me. Of the two Syllabi you have kindly sent me I shall ask you to give that upon "The Development of Plants in Geological Time". The number of lectures shall be either six or seven as you may find desirable to be given two in each week in January.

Dr Cotting will correspond with you later & arrange all matters of detail.

Believe me to be Yours very truly

Sir J. William Dawson. Augustus Lowell.

Lanell
