Dear Sir,

Please accept my
heart thanks for the copy of
your paper "On Rhizocarps
in the Eriem Period of America",
which you have so kindly sent
me. — At the time when
I wrote about the Tasmantite
I was not aware that bodies
with the same structure had
been described and that you
had named them Sporangites

otherwise I should not
have proposed another name.
It was only a short time
ago that I saw for the first
time some American specimens
with structure similar to
what I had noticed in the
bodies from the Australian White
Coal. I am sorry that I
should have seemed to
ignore your papers, for
I thought I had made myself
acquainted with all your

work on the subject.

Again thanking you for the
pamphlet

Remain

Yours very truly
E. T. Newton
