

540, KING'S ROAD,
LONDON, S.W.

THE COUNTY OF MIDDLESEX
NATURAL HISTORY AND SCIENCE SOCIETY.

Shubert

Sept 3 1886

Dear Sir,

As one of the many
students who have anxiously
waited for your address to
the Brit. Assoc. allow me to
thank you for the interesting
matter you have given us
to think over.

You say "I do not know that
any fossil insects or arthropods
or millepedes of Europe and
America are specifically
identical -"

In the best of my knowledge
Helix labyrinthica of the
Bunerside Limestone is closely
allied if not identical with
Helix labyrinthica, Say. specimens

which are before me from
Columbus, Ohio.

I do not suppose this information
will be new to you but it may
refresh your memory.

You will perhaps remember
me as being introduced to
you by Mr. Land (carpenter) who
being the friend of my father
Jones who has been allowed
to consult & assist with the
Logan papers

with renewed thanks

Yours Dear Sir

for your very

Chas. D. Sherborn

Lt. Wm. Dawson F.R.S.
