Montreal, Feb'y 15th 1887

Dear Sir William Dawson

The tract which you kindly sent me came to hand yesterday for which please accept my thanks as well as for the hint as to the other work.

From a somewhat-hasty perusal of it there would seem to be practically little difference between the state of the question now & at the time "Archai" was written except perhaps that the theory of Evolution has come up more prominently.

I have for some time been making a careful study of the whole question & must say I never before saw such beauty & charm in the opening Chapters of the Bible, & I may also say that I consider the work you have done of inestimable value in opening up these questions & throwing the light of true Science on the Grand Story of Creation, I am dear Sir

Yours Sincerely

J. S. Buchan

Dear Sir William

The best which you have
 sent me comes to hand yesterday for
 which please accept my thanks as well
 as for the hint as to the other work.
 From a somewhat brief perusal
 of this would seem to be practically
 little difference between the state of
 the question now & at the time "Graham"
 was written except perhaps that the
 theory of evolution has come up more
 prominently.
 I have for some time been making
 a careful study of the whole question &
 must say I never before seen such beautiful
 reasoning in the opening chapters of the
 Bible. I may also say that I consider
 the work you have done of great value
 in opening up these questions & that
 the light of your pen on the "Graham"
 of evolution, I am sure Sir
 Yours sincerely
 J. Buchanan
