PRESIDENT: C. D. HARDCASTLE.

HON. SEC.: S. A. ADAMSON, F.G.S.

52, Well Close Terrace,

LEEDS, *Nov 17* 1887

Dear Sir

Along with this letter
I beg to forward Parts 1 & 2 of the
Transactions of our local Association,
which kindly honours me by accepting -
of course it can only be termed the
work of amateurs, but still we work
hard and do our best - I should not
have taken this liberty, but remembering
your kind words to me at the close of
the British Association meeting at
Birmingham and also the kindly note
awaiting me upon my return home for
which I was indeed grateful - You
will probably remember the account
of the great Pond tree I then brought
forward a photograph of which you
also at the time honoured me by

Accepting - In the pamphlets sent you
will find brief accounts of some further
examples which were not discovered at
the time of my paper - These I trust
will interest you - Your books and
writings I have revered for many years,
and this ~~stress~~^{too} impels me to forward these
accounts of matters so interesting to
geologists - With feelings of profound
regard and a prayer that you may be
long spared to benefit the scientific world,

Sam^l D^r

Your faithfully

Sam^l A Adamson

Sir Wm Dawson P^r S^r to
