

Pale. Gippsland. Victoria

May 12. 1887

Dear Sir

I am in receipt of your circular letter of July 17 last. on the subject of a scientific expedition of the Empire.

It seems to me that as you propose a union of British and English speaking geologists for the purpose you refer to in the latter part of your letter, it would be very advantageous to geological science. It seems to me most probable that as regards the various scientific departments and societies in the Empire might be moved by the Royal Society in this matter will find effect. Being as I am at a distance from Melbourne which I rarely visit I am not able to bring the matter under the notice of the Royal Society of Victoria but I have forwarded your letter to one of the Council of the Royal Society of Victoria & try it under notice

I am Dear Sir

Yours very truly

Ad. Stewart
