

5 Essex Avenue

June 18th 1887.

Dear Sir William Dawson,

In reply to your
favor of the 9th inst.
I beg to say that I
appreciate very much
the feeling which
leads you to suggest
my ~~acceptance~~ for nomination
further as a Fellow
of the R. S. C.

I should suppose
that any Canadian
would esteem such
nomination in itself

as an honour.

Under the circum-
-stances - of but one
- vacancy I must
- consequently take my chances
- relying on the brief-
-ly recognizing relative
- merit and on my friends
- to make mine known.

The fact that I am
- Canada's first
- Physiologist in the
- sense of being the
- first to devote himself
- to the department of

Physiology and resource
Medical practice might
give me a sort of special
claim though one I
would not wish to
press over other considerations.

Most of our members
are probably better ac-
quainted with the
work of other departments
of natural science than
of Physiology. Again
thank you for your
kind action.

Yours sincerely

T. Wesley Hille.

Dr. Mully
