My dear Mr Tulliam Dawson,

you know, of course,
that Pecturch has resigned
the Serlogy Chair in Oxpd.
Our mutual friend Lapworth
is to be a candidate, & I write a
line to express the hope that you
will feel willing to give him your
most valuable support. He
is sure to write to you himself,
but I know what weight your

good word would have, & I
unto this party line in case
you might perhaps pledge yourself
to some one else. I think it most
desirable that he should be suc-
cessful - partly because he is the
very man to do honour to the
University & to ~~enlarge~~ enlarge the
boundaries of the Science, & partly
because he has hitherto had such
a hard time in all respects, &
is entitled, more than most
men, to have a part when the
work is not excessive, & where
the emoluments are at any rate

reasonably good.

I have been for months over head
& ears in purrs & special work
of all sorts, & have ^{had} to let Stoma-
topoids & all my other pets
Galone. I was delighted with
your suggestion for making the
Julilee a real geological
epoch, & trust your ideas will
be warmly taken up & carried
out.

Pray excuse this hasty note,
& believe me, with best regards,

yours very sincerely
