

Clyde Whinn  
Foots Notes  
Aug 9/84

Dear Mr Johnson,

Mr Medley writes  
from that he has seen  
Mr Lamm who advises  
to get a 4 horse steam  
engine as opposed  
and which I understand Mr Medley is the owner,  
to Mr Lamm and the  
(Lamm) will fit  
up the dynamo and  
put the whole in  
running order at low  
price. Lamm seems  
asked Johnson to make some  
date of date for or will

very desirous to do the  
work as an illustration  
of what he can  
do and Mr  
Morton is inclined  
to take his advice  
and offer; but  
asks me to consult  
you. I have no  
doubt however  
that this will  
meet your views

and that I am well  
do the best to do  
what you wish,

I presume you  
have any further sug-  
gestions to offer please  
write to Mr. Brown,

I may add that  
Lewin has had an  
offer for an octo for  
the U States; but thinks  
it is not the newest  
pattern and that

it will be well to get  
one of the best papers  
England. I am also  
I say it would be  
an advantage I have  
a storage battery which  
will cost \$200 but  
I say it can be dis-  
posed with for the  
purpose of desired, and  
the motion does not  
need to add to much  
to the expense.

Truly yours

Wm Dawson

B. Shaw writes to me Mr. stating that  
I think the arrangement first subject to any  
suggestion from you, M.D.
