

10, JEROME ROAD,
LONDON
S.W.

My dear Mrs. Innes

Sept. 1884

Sept. 17 / 87

My dear Mr. William

Inclosed is the printed Abstract of
your paper on Loxoon. I first if I
sent one to you from Manchester -

I read it to the Meeting, and there
was a good discussion on Sterry Hunt's
"Elements of Primary Geology" & Loxoon together.

Sterry Hunt & ^{15th} Herbert Carpenter were the
only geologists on our side, several
speakers criticized Loxoon - and I
replied to them, & recommended them
to learn more about it. I took four

of your specimens to show to part of
the audience - but an ignorant fellow
gave one of them & scratched it - and he
got a scolding from the Chair. - Well ^{never}

still to get Prof. P. MacDuncan to
look at the specimens - & some other
if possible - Have you any
special destination for your Paper?
I daresay that the Geol. Magazine would
publish it, - but Dr H. Woodward
(Editor) has not yet returned to town.
Mr. C. D. Sherborn has made a very
complete Bibliography of Spores

I will have a talk with
Dr Herbert Carpenter at first opportunity.

I will also enquire at the Office of
the British Spores if there be any spare
copies of the Abstracts so that we may
distribute a few. With kind regards I am

Yours very truly
Wm. W. Dawson M.S.

Yours very truly
J. R. S. Smith
