Oct. 19/07

Dear Sir

The Geol. Mag. cannot afford to give any illustration for the Eozoon paper.

I can get a very good cliché of a very good cut of Eozoon with central tubular structure (taken from one of Carpenter's photographs) from Prof. Petrusch. It is an illustration in his new 2nd Vol. now in the press. There is no way of getting the cost of another cut, however.

Shall we publish the paper with that one cut?

Dr. Nicholson wants a small block of good Eozoon for his own slicing. Can I give him one from the parcel that is sent to my care? Excuse this trifling.

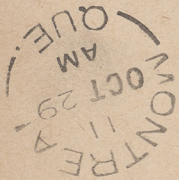

Yours very truly  
W. Nicholson
