

Stephen A. B.,
Nov. 23, 1887.

Sir William Dawson,
McGill University,
Montreal.

Dear Sir William, -

I feel
more grateful than I can
well express for your kind
and encouraging letter.

I have not tried Toronto
but will write at once to
Dr. Wright - you having
kindly offered to write to

disturb as well as in their services by the
sea; but I am inclined to doubt if
anything will be done in the matter while
the survey is under the present management.
Again thanking you,

I am, very respectfully,
and sincerely yours,

W. A. B. C.

I have received strong letters & recommendations from the
Mexican Authorities; Prof. G. A. B. C., Prof. G. A. B. C., & Prof. G. A. B. C.

Dr Nelson.

Since I wrote you a
friend who has considerable
political influence and is
a personal friend of the
Hon Geo White, has endeavored
to induce the Minister
to organize a branch for
birds & mammals, in
connection with the Geological
Survey, & he has managed
to stir up considerable
interest in the matter among
the politicians of Quebec and

Chambellan
