

New York, Dec 17 1887

Dr J. W. Dawson,

My dear Sir,

I am so certain

that I have your Supplement  
that your letter of the 8<sup>th</sup> has lain  
unanswered.

That the Canadian formations  
were then included was not understood  
by me, but it should have been -  
Your work will be incorporated so as  
to be presented when we meet at New  
Haven on the 29<sup>th</sup>. Please let me  
have a copy of your Supplement. It will  
be returned as I have a copy, which  
has stayed away from the volume -

The proof will be materially changed  
to suit some amendments suggested by Derby.

Carbonic is not satisfactory: but any  
change from Carboniferous would not be  
pleasing. The "Carbon" must be kept as  
it is a part of literature not to be  
thrown away. We shall all have to

yield something — as reported for the  
Upper Subsericea, I am disgusted with  
the amount of yielding that I must  
do.

Yours truly,  
J. H. Sturtevant

Stevenson

July

New York, 1881  
The amount of money that I want  
to be deposited with  
the University of the City of New York  
is reported for the  
year ending July 1st 1881
