

GEOLOGICAL SOCIETY,

BURLINGTON HOUSE, W.

22 Feb. 1888

Dear Sir William Dawson
On Monday I received
your MS. quite safely &
I will submit it, with your
letter to the President the
first time he comes in.
I should not think there was
any doubt about the paper
being read & printed, but the
eccentricities of Councils are
so astonishing that I
should not like to predict

their course of action. This
morning your second letter
arrived with the Abstract
& corrigenda, — the latter
I have transferred to the
MS. of the paper. —

Hoping soon to have good
news to give you as to the
fate of the paper, I am,

Yours very truly

W. S. Dallas
