

Kewington

May 9. 1888

My dear Mr Villiers - On my return
from Malta I find "The Geological
History of Plants", and wish to
tell you what great pleasure the
perusal of this most charming work
has given me. It has all the
charm and clearness of the
"Academic Geology" - I wd.

Y^r friend

entirely the most remarkable
of the attractions of the
well preserved history of the
ancient world.

I await with eagerness the
account of the sun's explanation
in B.C. and suppose that
after the Parliamentary Report

his next full of
Observations will probably
be the Mackenzie Basin.

My Father has had
a good deal of frost but
is better and thinks of
coming to London at the
end of this month.

Adieu me my dear Mr Williams
Yours & Y^r Obedient

Some
