

411 France St
Montreal June 15.

Sir William Dawson
Dear Sir

You may perhaps remember me as a student who took a partial course in Arts in McGill. I am now a 3rd yr. student in Medicine -

During vacation I have begun what may possibly develop into a volume - The 1st chap. of which I submit to you asking you to kindly examine it and give me the advantage of your opinion as to whether

P.S. If completed the work will consist of
two Chapters +

- 1- Histology. 2 Muscular system
- 3 Nervous System. 4 Respiration
- 5 Circulation - 6 Digestion

Some of the others might perhaps
be more interesting than the last

JR

any name will not be published -

it is worthy of publication -

If you think it is
I should deem it a
high honor to be permitted
to dedicate it to you -

I do not ask for a
personal interview but
merely for a written reply
as I am anxious that you
should not be embar-
rassed in giving a
clear answer -

Kindly write a
note in reply and I
shall receive it when
I call for manuscript -

Respectfully yours
J. T. Reid

Reich

Prinzess.
