

Portland, N.H.

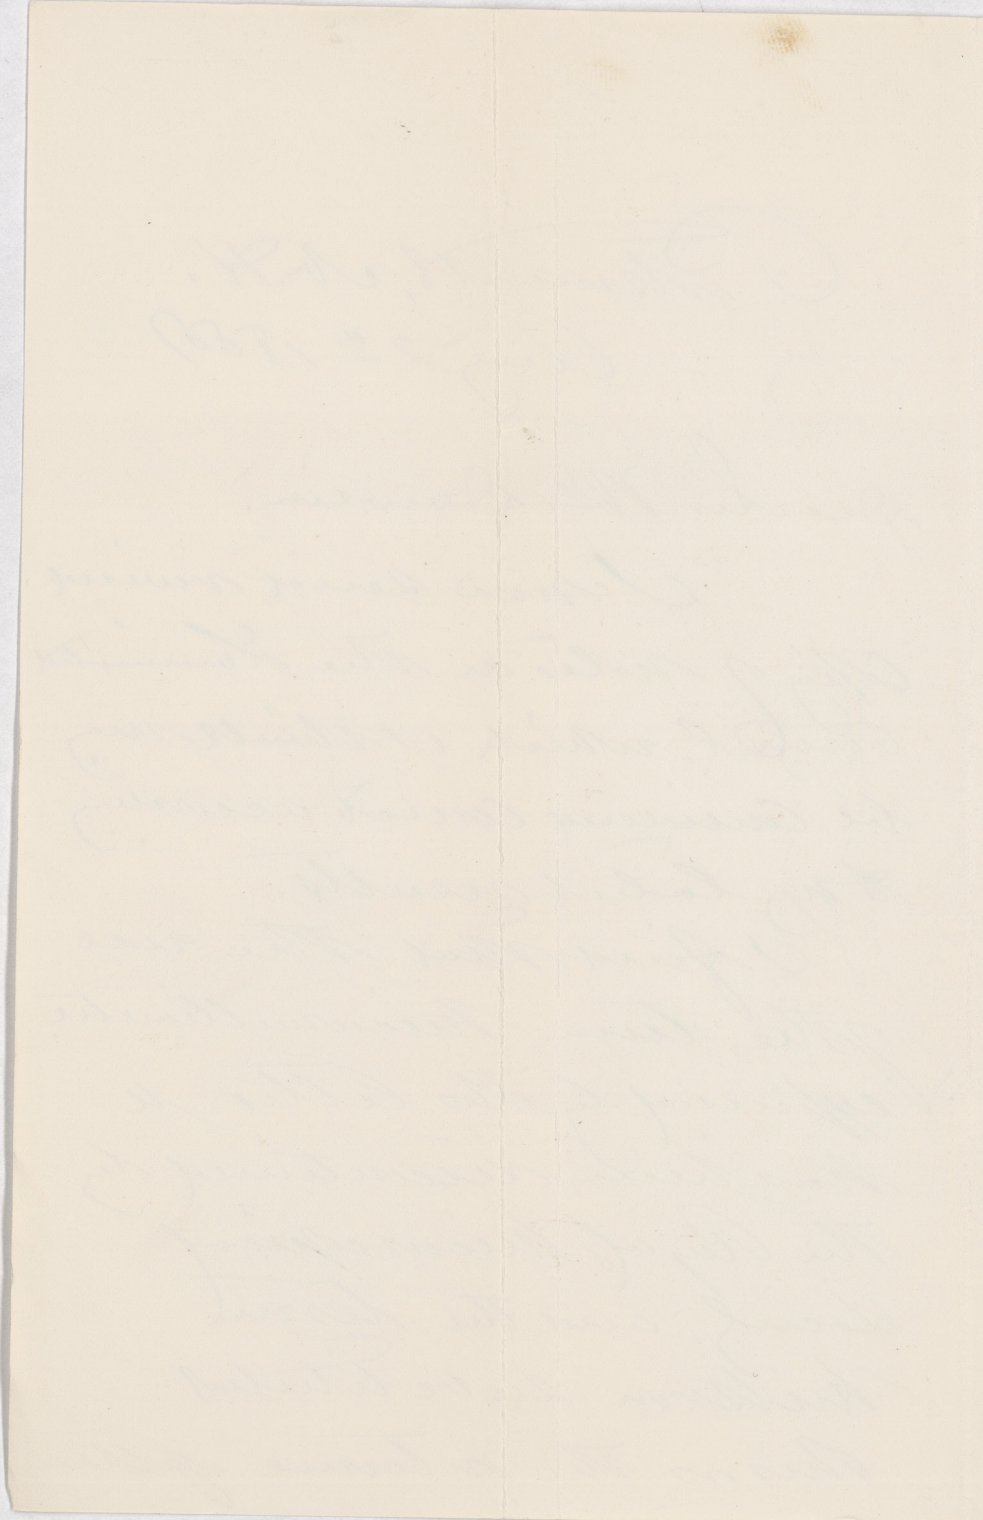

Aug. 2^d 1859

Dear Mr Dawson,

I now send revised copy of notes on the Laminated Fossil, which I think may be considered correct according to my latest results.

I find that the use of the term Micromillimetre expressed by the letter μ has been discontinued by the Royal Microscopical Society, and the term Mikron substituted.

This is the outcome of the

discussion in estate
and the mid term
seems in all ways to be
the more desirable.

I shall leave here
for Montreal about the
first of September in
order to get matters well
in hand before the
Session commences.

Mr. Puchallan foris in
cordial regards to Lady
and Miss Dawson as
well as to yourself.

Yours cordially
D. P. Puchallan
