

Wm
de J

Toronto

Nov. 30th 1888.

My dear Miss Williams

I am reminded by
the close of November, of the
hope you held out to me that
we might enjoy the pleasure of
a visit from you at some
later date, than my former
invitation. I do not know
exactly the limits of your
Christmas holidays; or whether
before or after Christmas will
suit you best; but if
Lady Dawson and yourself
will give us the pleasure
of a visit, Sybil and I

will be much gratified,
Name the time that will
suit you best; and the
longer you stay the better
we shall be pleased.

There are many matters
you and I will find
to furnish matter for
discussion; and for
comparing notes, with
a view to our own
special experiences and
requirements.

You may also find
an opportunity for some
practical interviewing of

the Minister of Education.
Our compact with the
City has only been concluded
this week. By it we are
secured in £6000. per
Ann. as the endowment
for a Chair of English
Language and Literature,
and for the Chair of
Geology: but with this
the Government undertakes
to spend a similar
amount on the School
of Practical Science,
so that there may be
openings there; such as
you anticipated with
us. The Minister has

plans in view for largely
extending the school
of practical science
in Mechanical and
Engineering directions,

Sybil will write to
Lady Dawson; and we
shall count on a visit
from you both as one
of our special Annus
pleasures.

Yours faithfully

Daniel Wilson
