Professor of Geology and Paleontology.  
J. F. KEMP, A.B., E.M.,  
Assistant Professor of Geology and Mineralogy.

Ithaca, N. Y., Feb. 6. 1889.

Dear Sir:

I thank you for the response to my circular  
and the papers just received:

- 13: On Specimens of *Erzogora Canadensis* & their geol. relations etc
- On *Erzogora* & Paleozoic rocks etc -
- On Sporocarps... of *Columbus* etc .
- On Cutaneous plants from Port McNeal etc -
- Notes on fossil sponges etc
- Appendix to "Mod. Sc. in Bible Land."
- Note on *Balanus Hameri* etc
- Note on spicules of *Archaeocystum Menziesii* ---
- On modern Concretions & notes etc - .

Your valuable treatise "The geological history of Plants"  
I have here, and have found it a very interesting  
and valuable compendium of the subject.

If there occur to you any out-of-the-way papers on  
paleontology written by Canadians and not appearing in  
the regular publications, I will be greatly obliged to be  
reminded of them.

Respectfully yours

H. S. Williams

Dr. Geo. W. Dawson  
Montreal.
