Sir J. William Dawson. C.M.G. etc

My dear Sir William,

Your Handbook
of Geology for Canadian Students
reached me yesterday and I hasten
to thank you very much for what
I am sure will prove a most valu-
able acquisition to my library -
It so happens that in the change
of our college system from a three
to a four year course, we have this
year no Senior Class and hence
no class studying geology proper;
but, (although I have not yet been
able to take more than a glance
at the work,) I can see that
your Handbook will be of much
service to me as a book of

reference, while next year I hope
to make it equally so for others.
The book is in every way an attractive
and useful one - and I am greatly
obliged to you for your kindness in
sending me a copy -

Our work has now fairly begun
as has, I presume, your own. Trusting
that you may have an enjoyable
and profitable winter, and with all
good wishes to the other members of
your family, I remain

Sincerely yours
L. W. Badley
