Sir Wm Dawson

Dear Sir

I have been doing a little decultory work in Science Collections, and accordingly send you for use in McGill Univ. a package of Polypterid Animals of the Pacific (by mail.) You can give them to the Prof. of Nat. History or keep them yourself, just as you think will be best for the Institution. The spirit of Agassiz must lament that there is not a department of Biology in all our Canadian Colleges, but it will come in time. You remember my wife, Miss Cady, I was teacher of Nat. Science in the Hamilton Ladies Collg for 20 years; am now retired in this pleasant land. Nat. Hist. specimens have no Customs Duty.

Yours very truly

W. P. Wright

I have sent the same to other Collges
