Dear Sir William

Allow me to thank you for  
your kind present of slides containing  
such fine sections of Nematophytum -  
as also for the piece showing structure, and  
for the care taken with Sir Joseph Hooker's  
Pachytheca slides.

I am about to visit Cornen where I shall  
endeavour to get some specimens of both  
of these plants, and I have just been  
reading with great interest the joint paper

by yourself through Venkathu with wonderful good fruit as  
Sudhe. Perhaps Suedy has her informant as to add  
a little more to the elucidate of the ~~interest~~ problems connected  
with these interest remains, altho' it seems rather too  
Suedh hope -

With kindest regards  
Remain Yours very sincerely

C. N. A. S. S.
