(Dictated)

Sir. William Dawson,

McGill College, Montreal, Canada.

Dear Sir:

We take pleasure in sending you by this mail a copy of "Gems and Precious Stones of North America," by G. F. Kunz. This work is pre-eminently the standard work of its kind and is indeed the only one which treats of the subject in a detailed and thorough manner. It is a systematic and at the same time a popular description of the several species and varieties of precious stones and pearls; their occurrence, value, history and archaeology. We specially call your attention to the magnificent colored plates, they are the finest work ever prepared for a book of this kind and no expense has been spared to make this in every respect the finest example of American art.

We should be pleased to hear from you giving us your opinion of the work.

Yours truly,

THE SCIENTIFIC PUBLISHING CO.

R. P. Rothwell
