

Dr. Green has been here and I have heard all his views about the matter. I shall also write with suggestions. We shall have to attend to the matter in September.

Birkenshaw,

Little Metis.

July 25/90

Dear Dr Comish,

I am in receipt of your favour of 23rd June. The work referred to is a very important one, and if we can do anything of help, ~~The work referred to~~ is a very important one and if we can do anything to help it will be some compensation.

For the ill that afflict
us in these Canada,
If we could get such
a man as the Collier &
Chambers (Perk) or then
Ernest M. Taylor (Wes),
either would be the
right man, but both
I suspect are better
qualified for. Possibly
Warden or Shaw would
know, or might have
some man of similar
gifts. I think it would
be well for you to write
to both and also to

Sapleau, who has pretty
general knowledge of
French workers beyond
his own church. Would
any of our present Colporteurs
do. There is one of them
I forgot his name who
seems a superior man
in appearance at least,
but I doubt as to the
fitness of any of them.

I shall return the
letter of Mr. Furb in this.

As to the Exam Papers
Swell has now got the
calendar out. Received
complete copies yesterday.

I shall write to him
to day and shall urge
his attention to the
Brain paper.

If you have any fine
Linn papers I would
not hesitate to visit
them, more especially
as the Faculty is what
I have a much better
shining next time.

Mott told me before
he left that he would act as
the Suppuration that he might
have the same time as last
year.

We are all well. Working
me a very pleasant holiday.
I remain your sincere
friend
Wm. D. Smith
